## Trivia Hunt

Answers can be found at the bottom of page 1

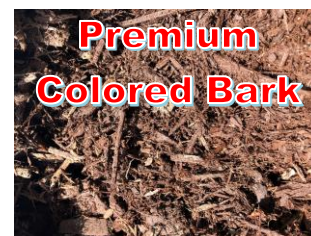

- Who was the first Green Bay Packer to gain more than 8,000 career rushing yards?
- What team originally drafted Brett Favre?
- Who was the Green Bay Packers very first draft choice?
- What were the Green Bay Packers originally called?

## HOT Products

### Premium Colored Bark:

This is a new product that TLB is featuring—essentially it is our Mixed bark sent through diamond screens to create a hairier appearance and then dyed dark brown. It offers UV-resistance, is safe for children, pets and environment, has a great deal of nutrition for plants, great curb appeal, helps conserve water, suppress weeds and helps to moderate soil temperature.

**Bottom line** this product is the best of both worlds... It offers the same coverage that everyone loves about our mixed bark and the beautiful deep dark brown color of our Chocolate/Walnut brown.

### Pine Bark:

A great throw back.

It's a highly loved product because of its price and similarity to Hemlock!

### Playground:

Many people don't know this—but we offer 3 different types:

- Shredded playground
- Woodchips
- Certified Playground

## Upcoming Landscaping Events:

Here are some exciting events happening around the Fox Cities area. If you're looking for a way to attract more customers or just get your name out there—you should check them out!

- Jan 17-19<sup>th</sup> WHBA Home & Outdoor Living Show- Oshkosh WI

## Grinding through the days...

WOW how can it be 2020 already? We bet you feel the same way we do—come on Mother Nature and let us have a nice dry year. As winter drones on—we continue to prepare product for spring with grinding and screening. Since we are 100% mobile in these areas of operations, we provide custom grinding and screening to all types customers. Put us to the test and ask us about our off-site custom grinding and screening 😊.

We do our custom grinding with several grinders, of various sizes, screen configuration and loading options. We can grind all different kinds of material like logs, yard west, treetops & slash ect... By using the right grinder, screens and loading equipment. We can take in material from very small to very large and can produce multiple different sizes of output to meet expectations.

Screening? Sure, we can separate material based on screen size, and like grinding, customize the job just for you. Our large trommel screener is used to screen, separate/size many materials such as soil, dirt, wood chips, mulch or compost!

Do you have a need for transportation or equipment services? The nature of our business demands trailers that can quickly load/unload bulk materials. TLB has multiple styles of "live floor" trailers, 53' van, open-top tarp trailers, flatbeds and refrigerated trailers. We also offer: Front-end loaders, skid steer loaders, log splitters, and excavators are all pieces of equipment TLB has available for any type of job.

The above allows us to custom build a package of services to get the job done that you want done. We have years of experience, with plenty of satisfied customers where we come in and get the job done safely and quickly. All accomplished with the services you need/want, solid communication, efficiently and at very reasonable rates.

If you have questions, are interested in learning more about the services/products we can offer, want to get a free estimate or evaluation, please contact us at any time.
